

PRAMOD B R

Pharmacokinetics & Pharmacometrics | PK/PD Modelling & Exposure–Response Analysis
Kushalnagara, India | +91-9980831330 | brpramod.careers@gmail.com | [linkedin.com/in/pramod-b-r](https://www.linkedin.com/in/pramod-b-r) | github.com/pbr26

PROFESSIONAL SUMMARY

Pharmacokinetics scientist with 5+ years in global CRO environments supporting preclinical, translational, and early-phase clinical drug development. Deep hands-on expertise in non-compartmental analysis (Phoenix WinNonlin), exposure and bioavailability assessment, PK dataset construction and QC, and regulatory-compliant scientific reporting. Actively applying population PK, PK/PD, and exposure-response methods using R and NLME workflows (nlmixr2 / Monolix-style estimation, simulation, and diagnostic evaluation) to support model-informed decision-making. M.Pharm (Pharmacology) with four peer-reviewed publications, strong working knowledge of ICH-GCP, GLP, and FDA/EMA expectations, and a proven record of delivering analyses and reports within matrixed, sponsor-facing project teams.

CORE COMPETENCIES

Population PK / PK-PD Modelling & Simulation · Exposure–Response (E-R) Analysis · Model-Informed Drug Development (MIDD) Concepts · Non-Compartmental Analysis (NCA) · Phoenix WinNonlin · NONMEM / Monolix / nlmixr2 (NLME) Workflows · R (tidyverse, ggplot2, xpose-style diagnostics) · PK Dataset Specification & QC · Dose Selection & Study Design Support · Regulatory Submissions Support · ICH-GCP · GLP · FDA · EMA · Matrix / Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Associate Study Coordinator (PK/TK) | Labcorp, Bangalore

Apr 2021 – Present

- **Perform pharmacokinetic analyses independently** across preclinical, translational, and early-phase programs — concentration–time profiling, exposure assessment, and estimation of clearance, half-life, volume of distribution, and bioavailability using Phoenix WinNonlin.
- **Build, specify, and QC analysis-ready PK datasets** from bioanalytical and study source data, including dosing histories, sampling deviations, BLQ handling, and covariate assembly — the foundation for downstream population PK and exposure–response analyses.
- **Apply PK/PD and modelling approaches** to characterise concentration–effect relationships and support dose-regimen and dose-decision assessments across multiple study designs, including cold PK, metabolite identification, and radiolabelled (¹⁴C) studies.
- **Develop population PK and PK/PD models in R-based NLME workflows**(nlmixr2, mrgsolve/RxODE simulation), performing parameter estimation, covariate evaluation, goodness-of-fit and visual predictive check diagnostics, and simulation of alternative dosing scenarios.
- **Author analysis plans, PK reports, and data summaries** including tables, listings and figures (TLFs) and concentration–time plots, to sponsor-ready and regulatory-compliant standards supporting submissions and publications.
- **Perform quality control and independent review** of PK datasets, analytical outputs, and reporting documentation to ensure data integrity and audit readiness; maintain records in Veeva Vault and support sponsor audits and regulatory inspections.
- **Work within a matrixed CRO service model** with bioanalytical scientists, study directors, toxicologists, and sponsor PK leads — managing deliverables against agreed timelines and overall project goals.
- **Drive process improvement:** optimised interim PK/PD analysis workflows to improve turnaround time by ~25%, and automated repetitive dataset assembly and plotting steps in R.
- **Serve as Lead Trainer** for new analysts and scientists on PK workflows, Phoenix WinNonlin analysis, and regulatory documentation, reducing onboarding time by ~50%.

Clinical Research Associate | Navitas Life Sciences, Manipal

Sep 2017 – Aug 2018

- **Coordinated clinical study documentation and operational activities** in accordance with FDA, EMA, CDSCO, and ICH-GCP guidelines.
- **Performed source data verification (SDV), TMF review, and CRF review** to ensure protocol compliance and clinical data quality.
- **Supported adverse drug reaction (ADR) and serious adverse event (SAE) monitoring**, safety reporting, and protocol deviation tracking within clinical trials.
- **Supported sponsor audits and regulatory inspections** through accurate documentation and compliance-focused study coordination.

INTERNSHIP

Research Associate (Intern) | Vyuhgenics India Pvt Ltd, Bangalore

Sep 2020 – Nov 2020

- **Conducted competitive intelligence and secondary research** on pharmaceutical pipelines, therapeutic areas, and R&D strategies, generating insights on drug development trends.

TECHNICAL SKILLS

Pharmacometrics & PK: Population PK / PK-PD modeling and simulation, exposure–response analysis, NCA; Phoenix WinNonlin; NLME workflows (nlmixr2, RxODE/mrgsolve; familiar with NONMEM and Monolix control-stream/project structure); model diagnostics (GOF, VPC, bootstrap concepts)

Data Analysis & Programming: R (tidyverse, ggplot2, data.table), Python (pandas, NumPy, matplotlib), SPSS, SigmaPlot, Spotfire

Clinical & Regulatory: ICH-GCP, GLP, GCP, FDA & EMA guidance; Veeva Vault, OpenText Documentum; analysis plans, study reports, regulatory-compliant documentation

Productivity & Platforms: Microsoft Excel, PowerPoint, Word; macOS, Linux (Ubuntu), Windows

EDUCATION

M. Pharm (Pharmacology) | JSS Academy of Higher Education and Research, Mysore

2020

B. Pharm | Rajiv Gandhi University of Health Sciences, Bangalore

2017
